

A77X

Near-/Midfield Monitor

Product Sheet → English

A77X

A revolutionary formula: 2 x 7 = 77

The A77X, due to its outstanding features, might become a true game changer: Equipped with the same advanced technologies as the A7X, it therefore is very similar to the two-way speaker. The A77X, however, distinguishes itself by much higher, compression-free maximum sound pressure levels and dynamics. Due to its power and radiation characteristics, it also is perfectly suited for both near- and midfield monitoring.

Driver technology

Like all models of the AX, the A77X features the ADAM proprietary X-ART tweeter. The two 7" woofers are identical with that of the A7X. With their large voice coils (1.5") and powerful amplifiers they are capable of both very high maximum sound pressure levels as well as very deep registers. The woofers do not cover the same frequency bands: while one of them is responsible for the (sub-) bass frequencies up to about 400Hz, the other takes over most of the midrange.

Amplifiers / controls

Each driver has its own dedicated amplifier. A 50W A/B amp is responsible for the X-ART tweeter, while the bass-/ midwoofers are driven by a 100W PWM amp each. The front panel includes a power switch and a control for the volume that retains the volume setting independently from the on/off switch.

Basic technical data

- German Handmade Precision X-ART Tweeter
- 2 x 7" Woofer [Carbon/Rohacell/Glass Fiber]
- Amp. Power RMS / Music: 250 W / 375 W
- 38 Hz - 50 kHz
- Max. SPL Per Pair at 1 m: >122 dB
- 5 Year Warranty

5 YEAR
WARRANTY

Reviews & Testimonials

Mixing on the A77X was a pleasure because they didn't cause fatigue during long sessions and they have no trouble resolving complex mixes.

[Steve La Cerra / Mix Magazine]

So there we have the ADAM A77X: an extremely able active monitor that's capable of accurately reproducing frequencies from 38 Hz to 50 kHz in a seemingly effortless manner, even when being run at some pretty serious levels.

[Bob Thomas / Sound on Sound]

Of particular note was the outstanding stereo imaging and enormous sound stage the A77Xs present. The Adam A77Xs are an outstanding monitoring solution.

[Guy Harrison / Audio Technology Magazine]
